Figures recorded in the business forecasts are forecasts that reflect the judgment of the Company based on the information available at the time of release and include risks and uncertainties. Accordingly, the Company cautions investors not to make investment decisions solely on the basis of these forecasts.

Actual business results may differ materially from these business forecasts due to various important factors resulting from changes in the external environment and internal environment. Important factors that may affect actual business results include, but are not limited to, economic conditions, the yen exchange rate against the U.S. dollar and other currencies, the tax system, and laws and regulations. Our company has adopted IFRS (International Financial Reporting Standards) since the first quarter of FY2022, and its financial information for the comparative fiscal year, FY2021, is also based on IFRS, but the financial information on the right is based on preliminary unaudited figures, and the figures are subject to change in the future.

Market Overview

- Commercial business
 - Demand for aircrafts and aircraft jet engines is sluggish because global passenger demand remains weak due to the great impact of COVID-19
 - Air passenger demand is recovering with an increase in the number of countries prioritizing the resumption of economic activities, including North America and Europe, but not in Asia
 - Market outlook is still uncertain due to the situation in Ukraine
 - It will take a considerable amount of time for the market to recover
- MOD business
 - There is a certain demand within tight defense budget
 - Stable orders are expected over the medium to long term

Specific Efforts

✓ Securing stable revenue in core business

- Cost reductions in existing orders of aircrafts for Boeing and commercial aircrafts jet engines
- Steady promotion of existing projects of development and mass production for MOD aircrafts and helicopters

H145//BK117 D-3
2 orders received from
National Police Agency

✓ Technology strategy in accordance with the change in market trends

- Rebuilding R&D in line with future vision
- Utilization of *Green Innovation fund* of government for development of carbon-free technology

Hydrogen aircraft core technology development

✓ Improving financial foundation

- Review of fixed cost structure
- Reduction of inventories through production innovation activities

Market Overview

- The impact of COVID-19
 - Some domestic railway operators are reviewing their railway related investment
 - Delays in overseas projects and postponement of bids are normalizing
- Supply chain Risk
 - The impact of shortage of electronic components, logistics disruption, and raw material price inflation is limited, but caution should be exercised
- Medium and long term forecast
 - Stable growth is expected in the railway business, based on the needs of railway infrastructure to deal with the congestion mitigation and environmental measures in emerging countries

- ▶ 2 proto-trains (10 cars) for R211A are undergoing spec tests at NYCT
- ▶ The mass production in KMM started in Q3 FY'21
- ▶ **The first prototype train will be delivered in Q3 FY'22**

U.S. M-9

- ▶ All trains (92 cars) under the base contract were delivered by Q1 FY'21
- ▶ Option cars are being produced
- ▶ **The last car will be delivered in Q3 FY'22**

Achieving quality levels trusted by customers

- Reduction of spoilage and repair costs
- Further promotion of Kawasaki Production System, and installation to the U.S. works

Expansion of components sales, after-sales service, and maintenance business

- Promotion of remote track monitoring service for north American market
- Promotion of train condition monitoring equipment for domestic market

COVID-19 and other risks	Carbon neutrality
<ul style="list-style-type: none"> - Demand is recovering - Prices of raw materials and logistics costs are rising due to the rapid normalization of the economy. 	Inquiries and requests for cooperation are increasing regarding decarbonization solutions, including hydrogen products

Specific Efforts

✓ Providing of products and services for a low-carbon and decarbonized society

Delivered a high-capacity battery propulsion system for the world's first pure battery electric propulsion tanker, ASAHI in FY2022

- System powers consisting of large capacity lithium-ion batteries, azimuth thrusters, propulsion controllers, power management devices, etc. can be efficiently supplied to the main propulsion unit and other equipment
- Contributing to reducing environmental impact by significantly reducing CO₂, NO_x and other emissions during operations
- Highly maintainable and contributes to reducing the workload of seafarers

(Photo by Asahi Tanker Co., Ltd. & e5 lab)

✓ Establishing a leading position in the decarbonization field

- Technology development for the spread of hydrogen energy
 - ✓ Obtained approval in principle (AiP) from Nippon Kaiji Kyokai (ClassNK) for a large, 160,000m³ liquefied hydrogen carrier
 - ✓ The World's first large ocean-going LH₂ carrier, SUIISO FRONTIER, won awards including the Ship of the Year Award 2021
 - ✓ Completed the world's first basic engineering works for a hydrogen marine main boiler

Market Overview

- Construction machinery
 - China's demand slumps due to the impact of lockdown by Zero-COVID policy
 - Demand outside China was recovered from the impact of COVID-19 and remains solid
 - Electrification will be promoted due to the environmental regulations
 - Automation and autonomy will be promoted due to a shortage of skilled workers

- Robots
 - General purpose robots supply remains constrained due to supply chain issues such as shortages of electric components, logistical disruptions, and lockdowns in China, despite strong demand for capital investment in automation
 - Demand for robots for semiconductors remains strong due to continued high levels of capital investment by semiconductor manufacturers

Specific Efforts

✓ Developing electrification and automation technology for construction machinery

- Development and supply of the latest hydraulic equipment and systems for electrification and automation to support customers

✓ Developing hydrogen-related products for decarbonized society

- High-pressure hydrogen regulator · Hydrogen supply system · Hydraulic hydrogen compressor

✓ Open innovation

Market Overview

- U.S.
 - Demand for off-road motorcycles and four-wheelers remains strong
 - Strong demand is expected to continue
- Europe
 - Retail markets recovered from the impact of COVID-19 and remain strong
- Southeast Asia
 - Showing a recovery trend YoY, but outlook remains uncertain
- Supply Chain risks
 - Shortage of semiconductors and raw materials, logistics disruption affect our product supply

Specific Efforts

- ✓ **Supplying products as much as demanded**
 - All efforts to achieve production plans
 - Changing production and revenue plans promptly according to the available parts, if production cannot be carried out as planned due to logistics disruption or insufficient parts supply
- ✓ **Expansion of the four wheeler business and electrification**
 - Investment in development to enhance product competitiveness
 - Preparation of the U.S. Plant and Mexico Plant to expand production capacity
 - Accelerating development toward the launch of BEVs and HEVs
 - Toyota, DENSO and four motorcycle manufacturing companies begin joint research on hydrogen engine
- ✓ **Strict control of fixed cost to slimming down**
